Intial Score: 24.65
Current Score: 68.42

Microsoft Secure Score is a cloud-based security tool that enables organizations to assess and improve their security posture in Microsoft 365 and Entra environments. The tool measures an organization's security controls and provides a score based on how well they align with industry standards and best practices.

By using Microsoft Secure Score, organizations can identify potential security weaknesses and prioritize remediation efforts. The tool provides actionable recommendations to improve security, such as enabling multi-factor authentication, implementing strong password policies, and enabling encryption.

The benefits of using Microsoft Secure Score include better protection against cyber threats, improved compliance with industry regulations, and a competitive advantage through a higher security posture. The tool is easy to use and can be accessed through the Microsoft 365 Security Center or Entra Security Center.

Current Risks Known: 190

Current Risks Monitored: 111

Current Open Risks: 79

Wade Bachelder's assessment currently has an excellent score between 67 and 100 out of 100 which is generally considered a high level of performance or achievement.

Please review the main plan for current risk and plans of actions & milestones for continued improvement and compliance.
